

Judul	Correlation of Myc Expression with Wee1 Expression by Zanthoxylum acanthopodium in Cervical Carcinoma Histology	
Nama Jurnal/Volume/issu/Hal	Pakistan Journal of Biological Sciences 25 (11), 1014-1020	
Peran	Co-Author	
No	Tanggal	Keterangan
1	20-10-22	Submission
2	30-10-22	Permintaan revisi
3	10-11-22	Pengiriman revisi sesuai dengan permintaan
4	30-11-22	Permintaan revisi final dan pembayaran
5	05-12-22	Pengiriman revisi terakhir
6	28-03-22	Accepted
7	01-04-22	Published

Waktu	Bukti Korespondensi
20-10-22	 <p>The screenshot shows a 'Submission Receipt' page from ScienceDirect. It includes the ScienceDirect logo, navigation links like 'Author Home', 'Become a Reviewer', 'Contact Us', and 'Logout'. The main heading is 'Submission Receipt'. Below this, there is a 'Manuscript ID' field with the value '10220-1000-0000'. The 'Title' field contains the full title of the paper. The 'Author' field lists the authors. The 'Journal' field shows 'Pakistan Journal of Biological Sciences'. At the bottom, there is a 'Manuscript URL' and a 'Date of Receipt'.</p>
	 <p>The screenshot shows the 'Welcome to Author Home' dashboard. It features a navigation bar with icons for 'SUBMIT MANUSCRIPT', 'MY INVOICES', 'GUIDE TO AUTHORS', and 'ACC SET'. Below the navigation bar, there is a 'In Progress' section with a blue bar. Underneath, it says 'Manuscript assigned to Reviewer for Scientific Review'. There are three buttons: '11014-PJBS-440', 'Original Article', and 'October 2022'. Below these are icons for 'File Attached', 'Submit Revised Article', and 'Acceptance Letter'. At the bottom, there are icons for 'Evaluation Reports' and 'Galley Proof'. The text 'Scanned with CamScanner' is visible at the bottom right.</p>

Komentar Reviewer dan respon author

No	Part	Reviewer Comments	Author response
1.	Author's name in first page and references	Situmourang	Dear Editor, This is a author name, Situmorang is a family name not Situmourang
2	Introduction	cite reference 4 before reference 5 in the article.	We have revised it
3	Experimental Animals	Write the total number of rats used in experiment.	a total of 25 Female rats
4	Discussion	Rephrase it https://www.nature.com/articles/s41392-020-00235-2	Cancer cells need nucleotides to maintain their unchecked proliferative and metabolic reprogramming.
5	Discussion	In the Ending of the Discussion section author has to write the Limitation/implication/recommendation in 3-4 lines.	We have revised it
6	Significance Statement	It is vitally important that scientists can describe their work simply and concisely to the public, especially in an open-access online journal. The simple summary consists of no more than 200 words in one paragraph and contains a clear statement of the problem addressed, the aims and objectives, pertinent results, conclusions from the study and how they will be valuable to society.	This study discovers that <i>Zanthoxylum acanthopodium</i> extract can as herbal for carcinoma cervical problem therapy molecularly. This study will help the researcher to uncover the role of <i>Zanthoxylum acanthopodium</i> in the molecular signalling of other target proteins for drug development in cancer. Thus, a new theory on the role of <i>Zanthoxylum acanthopodium</i> extract in the cervical cancer animal model may be arrived at.
7	References	Reference-checked only modify the commented one	We have revised it
8	Figures	Label the parts as A, B and so on. Cite the parts of Figure in its description also in an ascending manner.	We have revised it
